Notes:

- Resources are reported using a 2PGE+Au cut-off of 0.65 gpt
- Only blocks within a pitshell are reported as Mineral Resources
- Prices used were Pd=US\$1000/oz, Pt=US\$860/oz, Au=US\$1250/oz, operating costs (ore and waste)=US\$1.50/tonne, G+A and milling=US\$13.50/tonne
- Recoveries used were 68% for Pd, 67% for Pt and 40% for Au
- PGE+Au grade = Pt g/t + Pd g/t + Au g/t
- Mineral resources are not mineral reserves because the economic viability has not been demonstrated
